Who is the FCC to come down on the xm radio programming? I'm sorry if I display a slight ignorance here But It would seem to me that if local stations can't keep up maby they should look at what is wrong with there own programming and driveing people to the sayelite. I beleive that the presentent himself promotes a country of free interprise and compitition and that is what this country is founded on and till it gets to the point of doing the general public harm or becomeing dentramental to the safty of oure great nation the fcc needs to stay out of the issue. If I am stupid enough to pay for radio instead of getting it free. That should remain My choice not any one elsses. By the way with the bombardment of comercials free radio isen't so free and that is what really needs to be addressed. When FM was first introduced one of the big selling factors was its limmited advertiseing . What ever happened to that. there weather reports and trafic reports are loaded with comercials and trafic reports are at best very vague. They should be competting instead of distroying. I listen to my CDS because I am tired of the constent pounding of comercials. Its there own Greed that is distroying them. Leave xm and internet alone .find a better use of youre time and my tax dollers. God knows there are plenty of Issues like the type of negative sexual explicet material that is being sent out over the air ways for young ears to here. Try dealing with that one for a while.

Thank you
Mr. Thibodeau
